

METADATA GRAPHICAL USER INTERFACE

ABSTRACT OF THE DISCLOSURE

A computer for implementing a method for generating metadata
5 objects is disclosed. A graphical user interface of the computer displays a
spreadsheet including metadata information and/or metadata directives. The
graphical user interface further provides a command to convert the
spreadsheet into a comma separated value file. Upon a conversion of the
spreadsheet to the comma separated value file, the metadata information
10 therein is parsed in accordance with any metadata directives therein to
thereby generate the metadata objects.
